

Solid State Relays **SOLITRON MINI** With Integrated Heatsink

CARLO GAVAZZI

- AC Solid State Contactor in 22.5 mm housing
- Zero switching for heating and motor applications
- Rated operational current 10 A and 20 A
- Rated operational voltage 120/230 VAC, 400/480 VAC and 600 VAC
- Transient overvoltage protection
- LED-indication
- IP 20 protection
- DIN-rail and backplate mountable
- Terminal layout as contactor or SSR standard
- Insulation > 4000 V

Product Description

The *SOLITRON* Mini Solid State Contactor is designed for industrial heating and motor applications.

The Solid State Contactor is designed for DIN-rail and backplate mounting with integrated heatsink and overvoltage protection. The heatsink is moved to the back for optimal space-saving in the panel and easy wire mounting at the front of the relay. The limited current rating limits the need for optimal convection

cooling as provided with Solitron 30, 50 and 63 A versions.

The contactor elements are integrated on to the ceramic providing more than 4000 V insulation to the heatsink.

AC or DC controlled versions are available with terminal layout as the standard for contactors or the US Mil-standard for Solid State Relays. Built-in LED status indication for applied control voltage.

AC3 @Ta=30°C	3 A	5 A	3 A	5 A
Zero crossing detection	Yes	Yes	Yes	Yes
Min. operational current	200 mA	200 mA	200 mA	200 mA
Non-rep. surge current t=10 ms (Tj init.=25°C)	120 A _p	200 A _p	230 A _p	300 A _p
Off-state leakage current @ rated voltage and frequency (Tj.=125°C, max.)	< 1 mA	< 1 mA	< 1 mA	< 1 mA
I ² t for fusing t=1 to 10 ms	72 A ² s	200 A ² s	265 A ² s	450 A ² s
Critical dV/dt off-state	250 V/μs	250 V/μs	500 V/μs	500 V/μs

¹⁾ Remark: When mounting Solid State Contactors side by side, provide a space equivalent to the width of a single contactor between two adjacent Solid State Contactors or reduce the current flow to less than 1/2 of the rated value. Thermal measurements after installation must be made to secure correct ambient temperature. The ambient temperature is the temperature of the air flow just before it reaches the relay. A minimum distance of 120 mm must be kept between two rows of Solid State Contactors. Please refer to the drawing Panel Mounting. The ambient temperature in the top of a panel can be substantially higher than the inlet temperature of the cooling air.

Housing Specifications

Mounting	DIN-rail 35 mm or backplate
Weight	220 g
Housing material	PBT (Poly Butylene Theraphtalate)
Terminals	Screw with captive wire clamp
Control and power terminals	
Nominal	4 mm ² or 2 x 2.5 mm ² AWG 12 or 2 x AWG 14
Min.	0.5 mm ² , AWG 20
Mounting torque max.	0.6 Nm
Heatsink compound used	Dow Corning 340

Insulation

Rated impulse withstand voltage	
Input to output	4000 V _{imp}
Output to heatsink	4000 V _{imp}

Dimensions

Dimensions (H x W x D)	80 x 22.5 x 100 mm
---------------------------	--------------------

Thermal Specifications

	RN1A...10.	RN1A...20.
Operational temperature	-20° to +70°C (-4° to +158°F)	-20° to +70°C (-4° to +158°F)
Storage temperature	-40° to +100°C (-40° to +212°F)	-20° to +100°C (-40° to +212°F)
